Introduction

If there is one event that marks the agenda of beauty professionals, it is in-cosmetics Global.

Every year, ingredient suppliers from all over the world meet with manufacturers to present the active ingredients that will make the cosmetics of tomorrow.

For this 2023 edition, Gattefossé, Seppic, Givaudan, Vytrus, Microphyt and many others present a preview of their new products that will be unveiled during the show.

On the program: anti-aging actives, soothing ingredients, innovative raw materials...
So, ready to dive into the future of beauty?

Antera 3D

Skin Analysis As It Should be

PRECISE

- High repeatability.
- Instrumental error is less than 2%.*

3 in 1

- Skin profilometer.
- Multi-spectral analyser.
- Colorimeter.

FAST

- Point & shoot. Image acquisition takes less than one second.
- No post-processing. All data available in real-time.

POWERFUL ANALYSIS

- Baseline and Follow-up images are automatically tagged and displayed in chronological order, providing a clear timeline.
- Output hundreds of measured parameters to an Excel spreadsheet with a single click.

DATA EXPORT & REPORTS

- Create Reports with your images, graphs, and tables.
- Compare more than 100 images in just a few seconds.
- Data can be exported to CSV files with a single click.

EASY TO USE

- No set-up time is required. Just point & shoot.
- Advanced algorithms to assist the operator to acquire images.

* Tests were carried out on artificial skin samples according to the Guidelines for Evaluating and Expressing the Uncertainty of NIST Measurement Results, NIST Technical Note 1297 1994 Edition

ROBERTET, NATURALLY CREATIVE

Robertet, the undisputed leader in natural raw materials, deploys its expertise in a cross-functional and synergistic approach across three divisions to offer new cosmetics and fragrance actives.

The raw materials division, through its unique sourcing know-how, introduces natural ingredients that are always more respectful of the environment and obtained through green and waste-free extraction processes.

The H&B division expands its range with three new cosmetic active ingredients:

- Broad Spectrum Hemp Oil, a COSMOS approved CBD extract with soothing and anti-inflammatory properties
- Dimpless (a melon juice concentrate) visibly reducing cellulite appearance
- Tasmanol (obtained after a CO₂ extraction of Tasmania lanceolata leaves) reducing the appearance of stretch marks

And the fragrance division unveils, a renewed ActiScents™ concept : perfumes with a natural active core, and proven physiological properties for the skin and hair.

Our perfume compositions are at the crossroads of olfactory creation and science of active ingredients, opening up new areas of beauty innovation.

Welcome to the naturally creative future of cosmetics solutions.
